20190603 – Sprint 4 Review Meeting Minutes

Date: 3<sup>rd</sup> June 2019.

Client: Dammika De Silva

Attendees: Chulanga Averil, Kasundi Maneesha, Poornami Wijekoon, Baratha  
Aberathna

Start time: 2.00 p.m(SL time).

End time: 2.30 p.m(SL time).

During this meeting we discussed about the progress of our project Property Management System. Firstly we presented our GUIs and Wireframes to the client. The wireframe prototypes for each function were presented to the client whether to decide the prototypes meet the client's expectation. The modification to the prototypes and new features to be added were discussed. The usability and user experience goals of the user interfaces designed were taken into consideration when presenting the GUIs to the client. The technologies used to implement the system were discussed. The information included in the design diagrams like class diagrams , user case diagrams and high level system diagrams were discussed with the client to gain further clarification about the system design.

Then he gave us a feedback on the documents we presented and advised on how to do the coding and what coding methods should be used. He And we discussed the issues we had regarding the project with the client. After that client gave us some new ideas to look through for the implementation of our project. After the 'Sprint 4 Meeting' we contacted our client by sending the work we did weekly through emails.
